

Phase 1 -- Requirement Analysis & Planning

Stakeholder Roles & Responsibilities

Date	2026-07-01
Project Name	Automated Employee Onboarding & Offboarding System
Author	AYUB HUSSAIN SHAIK
Organization	SKILLWALLET INTERNSHIP
Document	Stakeholder Mapping

Overview

The solution leverages collaboration among HR personnel, management staff, IT specialists, facilities coordinators, and security personnel through the ServiceNow platform. Each team manages domain-specific activities aligned with their expertise. Role-based security mechanisms restrict visibility and actions to tasks within each team's scope.

Organizational Stakeholder Map

Human Resources (HR) Team

Primary Function: Request initiation and employee record management

Key Activities:

- Originate onboarding and offboarding request submissions
 - Preserve employee documentation and compliance records
 - Process requests via ServiceNow interface
 - Validate accuracy of submitted employee information
 - Facilitate inter-departmental communication during lifecycle stages
-

Management Personnel

Primary Function: Request authorization and lifecycle oversight

Key Activities:

- Authorize or decline onboarding request submissions
 - Approve employee separation and offboarding procedures
 - Ensure departmental task completion and compliance
-

Information Technology Department

Primary Function: System access provisioning and account management

Key Activities:

- Establish employee user accounts and access credentials
 - Configure system access for required business applications
 - Terminate digital system access upon employee separation
-

Facilities & Space Management

Primary Function: Physical resource allocation and asset management

Key Activities:

- Assign workspace and workstation assignments
 - Distribute workplace equipment and office supplies
 - Recover organizational assets during exit processes
-

Security & Compliance Team

Primary Function: Physical access control and policy enforcement

Key Activities:

- Authorize facility premises access
 - Administer security protocols and standards
 - Revoke physical building access upon employee departure
-

Intended Results

- Transparent role delineation across all departments
- Streamlined cross-functional collaboration
- Secure and well-structured employee lifecycle procedures
